We are ready to start working!

HOW TO USE CALCULATOR

Open the calculator

1. **Root.** Enter a number (if you don't, default number is 2), press the root button (the sign "√" will appear on the screen), enter another number. Your entry, for example, will look like this: 3√8

2. **Exponent.** Enter a number (base), press the exponent button (the sign "^" will appear on the screen), enter another number. Your entry, for example, will look like this: 5^2

3. Delete. When you press the delete button, the entire line you wrote is erased
4. Factorial. Enter a number, press the factorial button (the sign "!" will appear on the screen). Your entry, for example, will look like this: 5!
5. Logarithm. Press the logarithm button (the sign "log" will appear on the screen), enter a number (base), enter another number in brackets. Your entry, for example, will look like this: log3(9)

UNINSTALL

● Open the folder of a calculation and run "Uninstall unins00"

● Confirm that you want to uninstall the program, press "Yes"

● After a short time, the Calculator is installed press "Ok" to exit the installer.

You have successfully uninstalled the Calculator!
